HTi

Self-Service Scale with Large Elevated Display

SPECIFIER STATEMENT

Self-serve HTi scales include a large elevated display, dual-core processor and Linux operating system. HT scales weigh, automatically compute a price from stored PLU's, and print a label. The HT scales utilize Hobart's patented, three screen swipe technology user interface for operator ease of use. Scales on the same network may connect remotely to other scales for a HWS (Hand Wrap Station) or other applications.

The free-standing pedestal and bowl are optional accessories for the self-service scale.
